

*Monza, 24 Luglio 2014*

# **Il BIM nel processo edilizio: architettura, strutture e impianti. *Progettare, costruire e manutenere.***

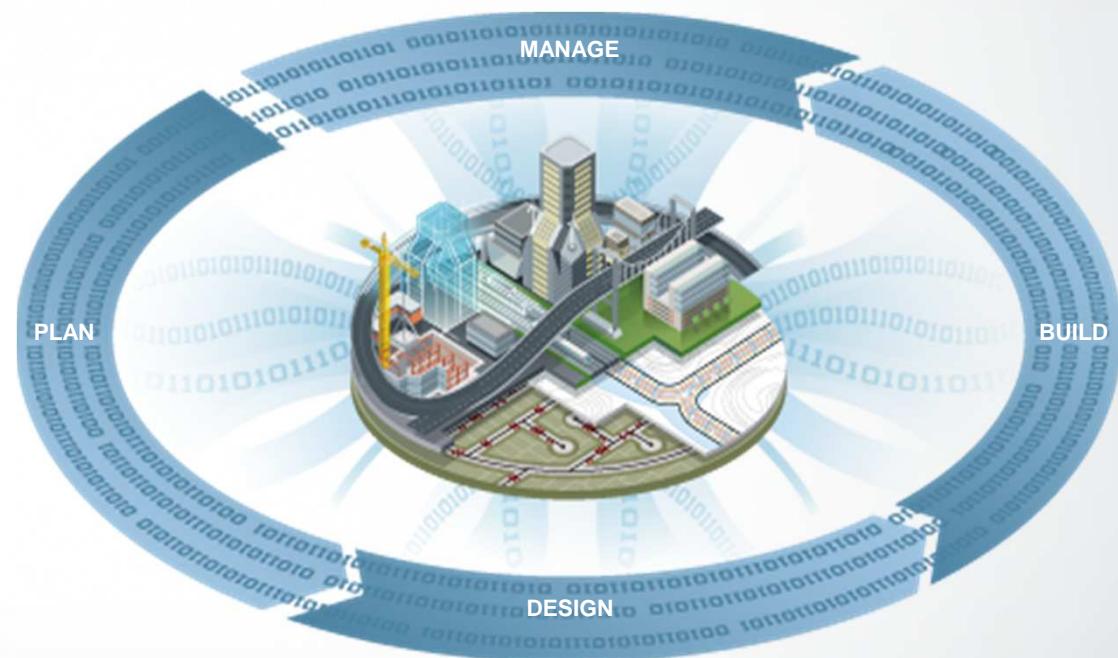

Cesare Caoduro

BIM Senior Technical Specialist - Construction

# Il Building Information Modeling sta trasformando il mercato AEC perchè costituisce un processo 3D intelligente basato sulla modellazione

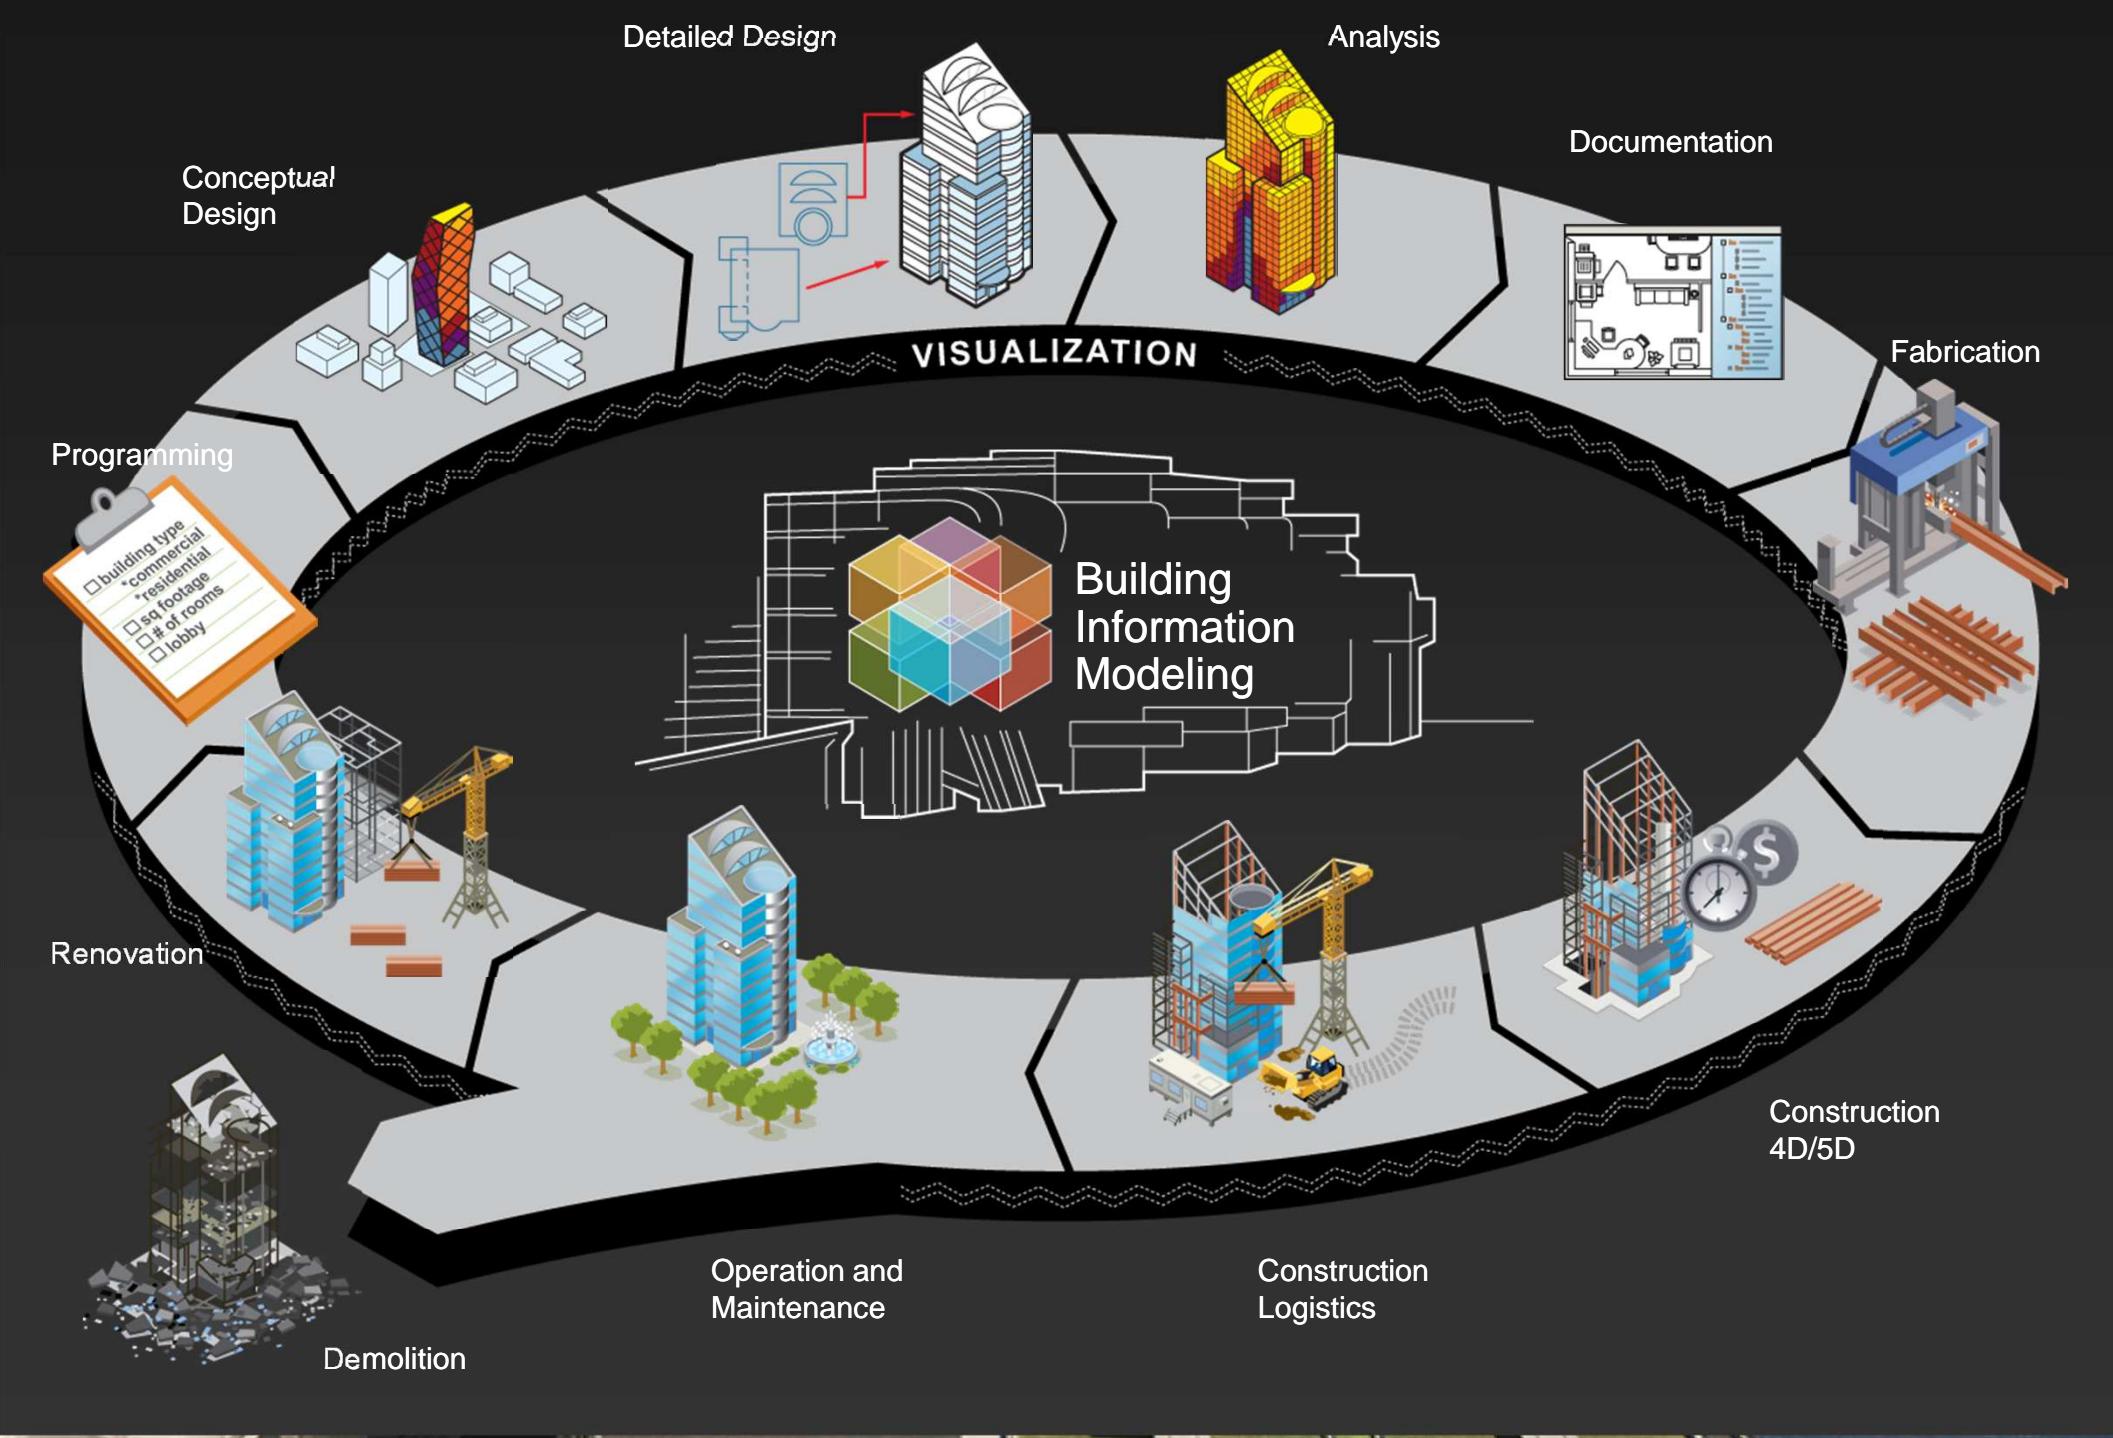

I prodotti Autodesk AEC costituiscono un passo fondamentale nell'evoluzione da una metodologia tradizionale basata su disegno ad una progettazione basata su modello ***riguardante tutte le fasi di vita del progetto***

# Building Information Modeling: *un nuovo approccio progettuale*

## Definizione:

il BIM è una *metodologia di lavoro* che presuppone la creazione e l'utilizzo di *informazioni computabili coordinate e internamente coerenti* relative al progetto di un edificio in tutte le fasi di vita del progetto.

# Industry Trends

## Building Information Modeling

How will changes in the global economy – it's form, function, success and failure affect Construction...?

## Globalization

What of “Tomorrow’s People” – how will they play, live and work; what will their cities be like, how will the digital generation shape Construction...?

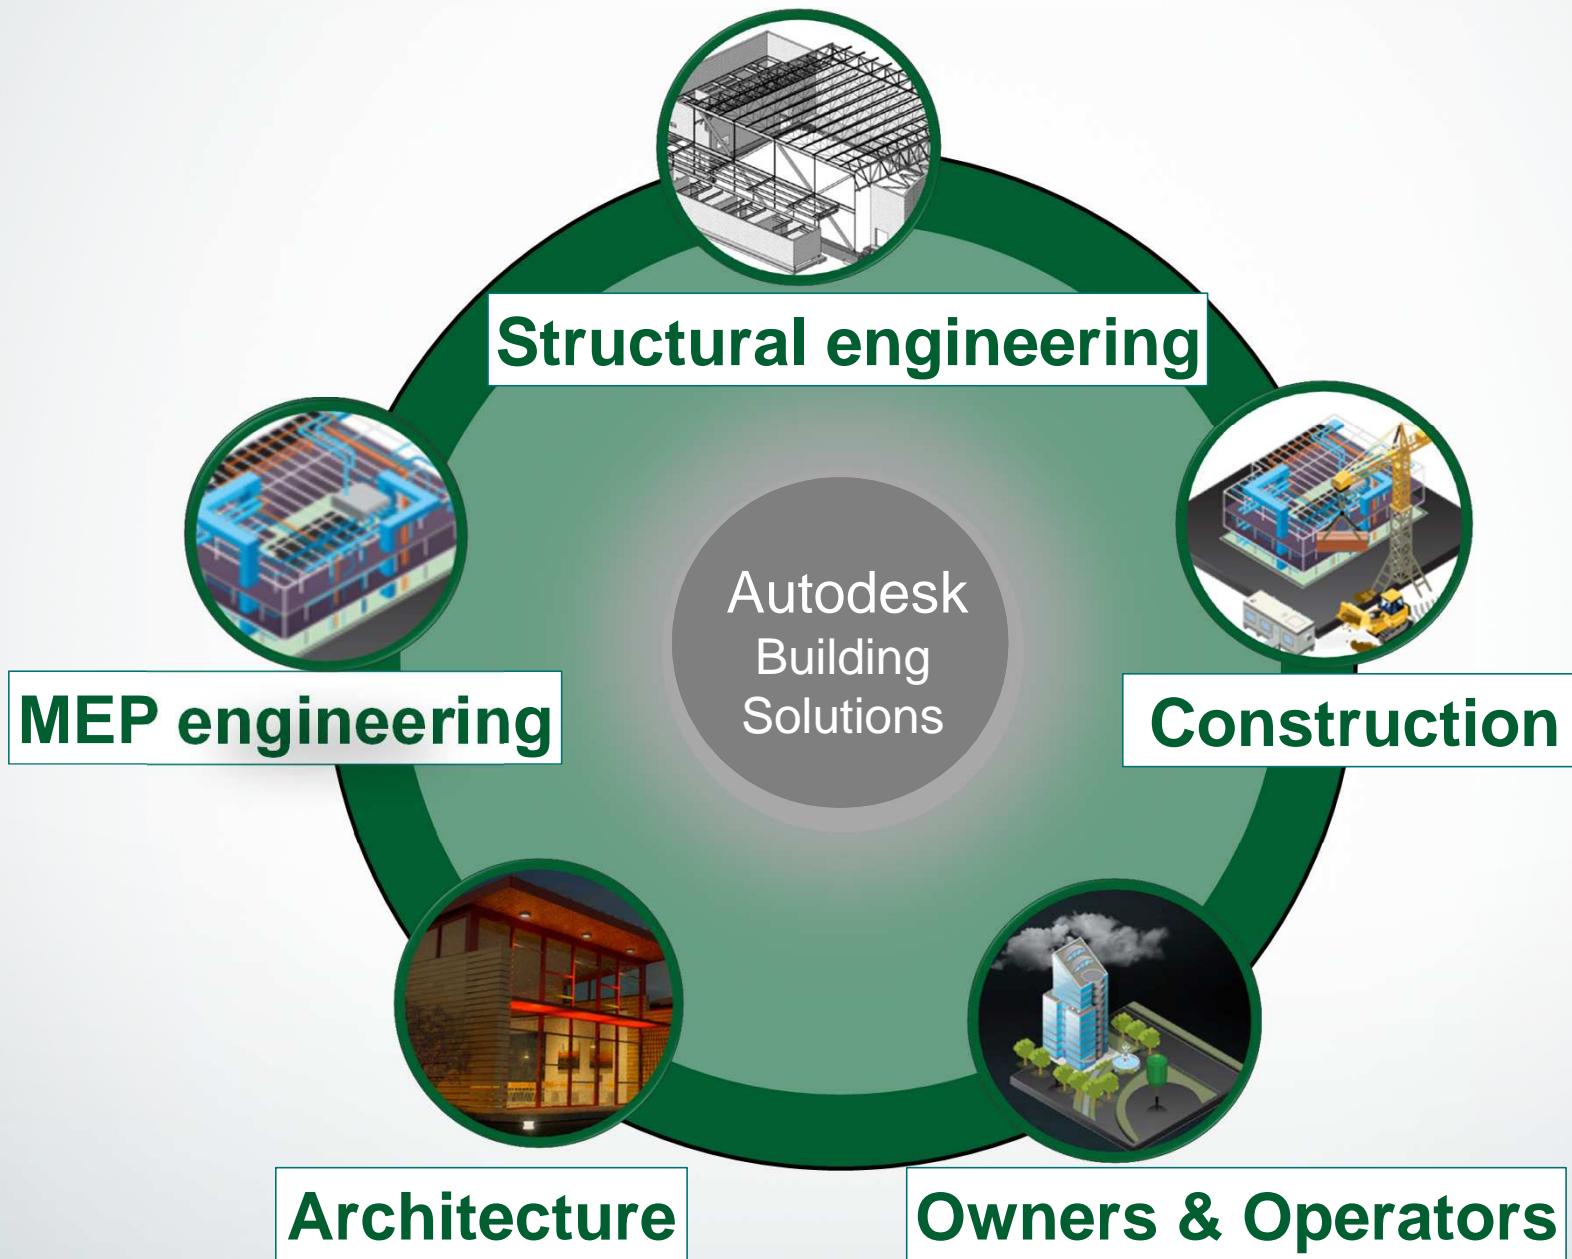

## Green Mandates

How will Construction address the infrastructure challenges of the growing global community and do that in a responsible manner...?

## Integrated Project Delivery

From the death of data, through the rise of information, to the age of knowledge...!

# BIM – Nuovo Approccio alla Progettazione

# Autodesk Solution

**AutoCAD**  
Design and share drawings in the DWG™ file format

**AutoCAD Verticals**  
Versions of AutoCAD specifically created for building

**Revit Family**  
Create better buildings with intelligent 3D-model based design

**Autodesk ReCap**  
Autodesk ReCap allows architects, engineers and contractors to create intelligent 3D data from laser scans and captured photos.

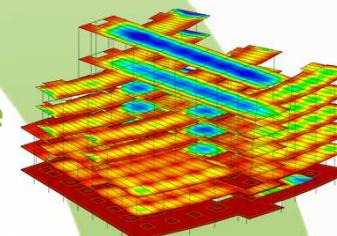

Design

Visualize

**3DS Max Design**  
Produce compelling visualizations to market your designs

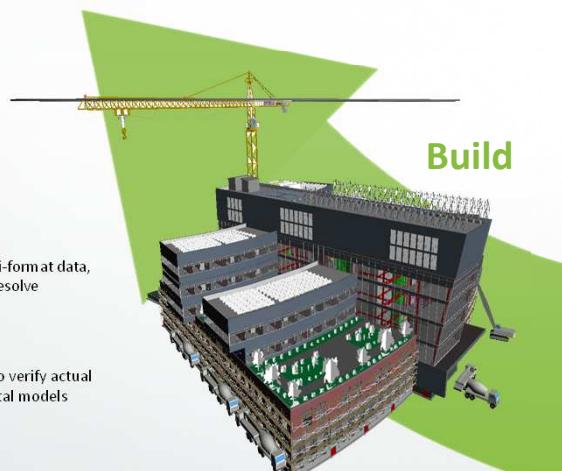

**Showcase**  
Transform your designs into immersive, interactive presentations

Analyze

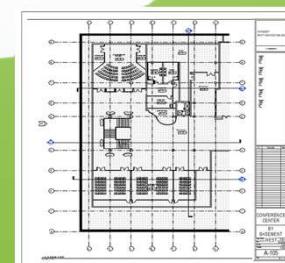

**Revit Family**  
Building Information Modeling for architects, engineers and contractors

**Navisworks**  
Simulate project sequencing to better coordinate your project sites

Build

Document

**Navisworks**  
Integrate 3D models and multi-form data, help coordinate designs and resolve conflicts.

**Autodesk ReCap**  
Autodesk ReCap contractors to verify actual construction against their digital models

**AutoCAD**  
More Accurately document and share drawings in the DWG™ file format

**AutoCAD Verticals**  
Efficient documentation with versions of AutoCAD specifically created for building

**Revit Family**  
Keep your project documentation coordinated and consistent with Building Information Modeling

Schizzare piante  
Schizzare prospetti  
Schizzare prospettive

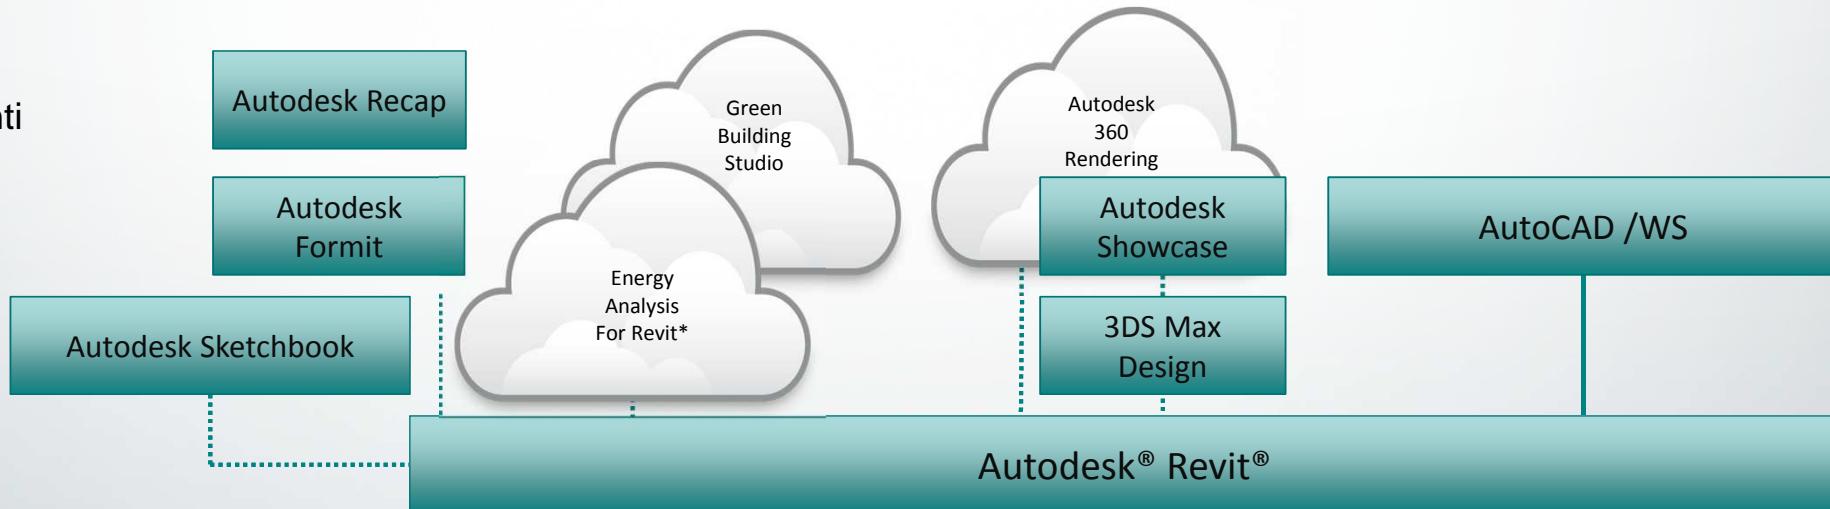

Creare masse  
Creare un modello energetico  
Condurre analisi concettuali energetiche  
Calcolare il consumo di CO2 e acqua

Sviluppare un modello 3D  
Creare un rendering iniziale

Esplorare alternative  
Sviluppare animazioni  
Finalizzare i rendering  
Finalizzare le animazioni

Produrre formati DWG secondo le richieste

Gli strumenti Autodesk

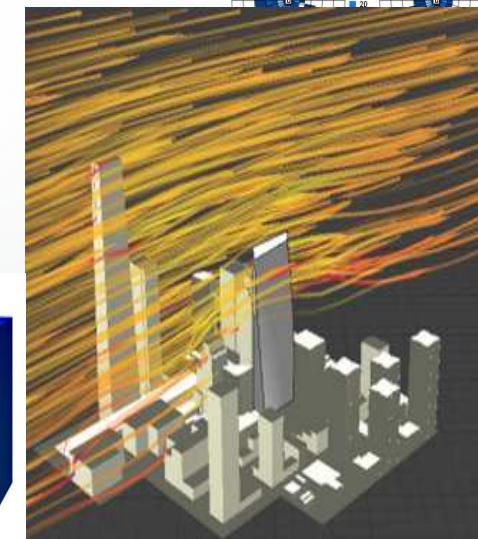

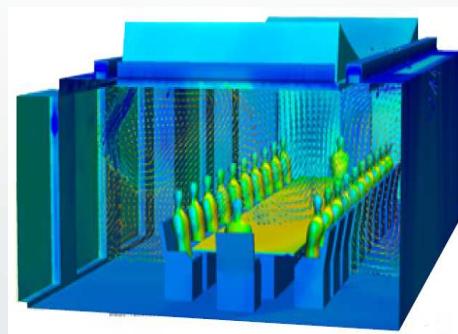

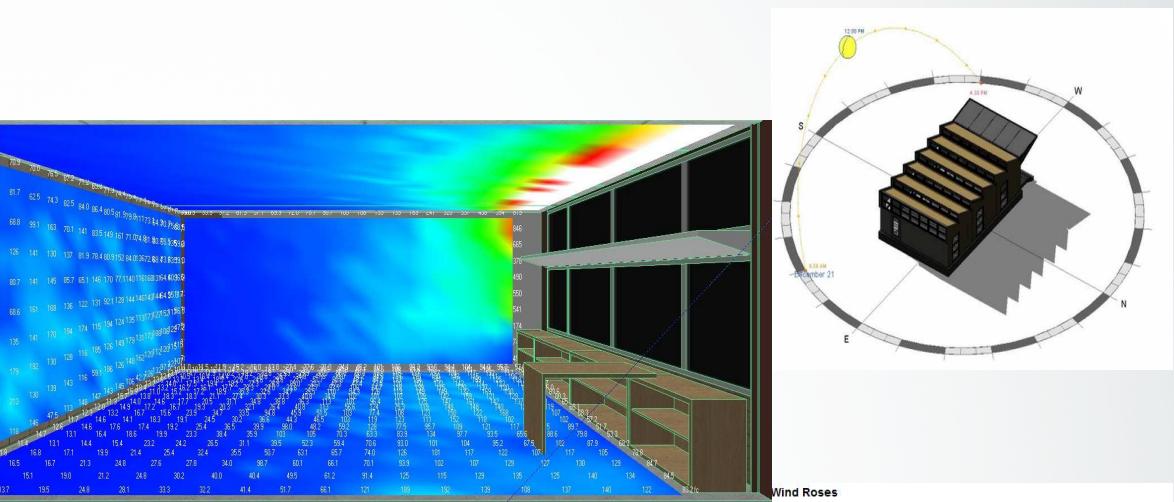

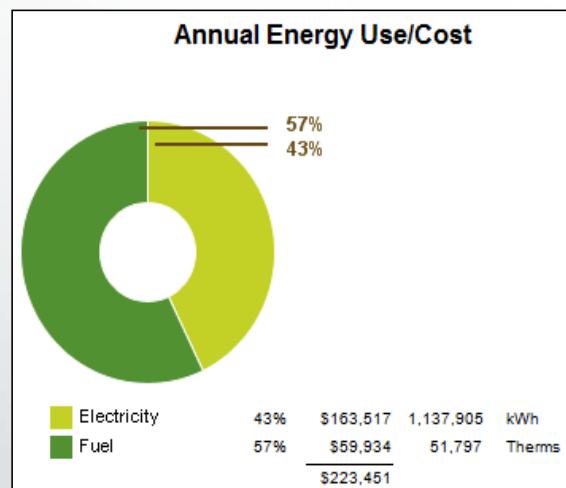

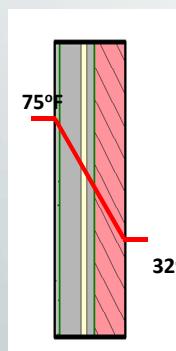

## #. Analisi della performance energetica

## **Che cosa si intende per Analisi delle Prestazioni?**

BPA è un **processo** che comporta l'applicazione di **software di modellazione e simulazione** che fornisce intuizioni univoche in una vasta gamma di **problemi di qualità ambientale e energetica** durante **l'intero ciclo di vita dell'edificio**, al fine di contribuire a **fornire prestazioni superiori a costi inferiori con maggiore certezza.**

# Valore della proposta

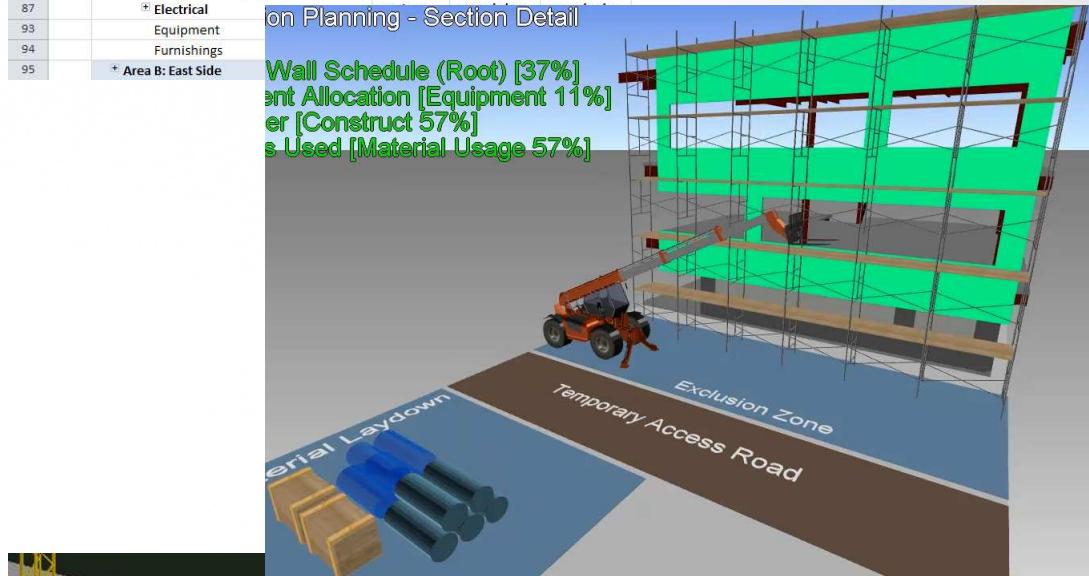

- Acquisire conoscenze per migliorare la costruzione
- Accedere prontamente ai contenuti di progetto
- Creare dati BIM per la gestione delle interferenze, analisi costruttive e fabbricazione
- Migliorare sostenibilità e risparmio
- Adottare processi e procedure più efficienti

# Valore della proposta

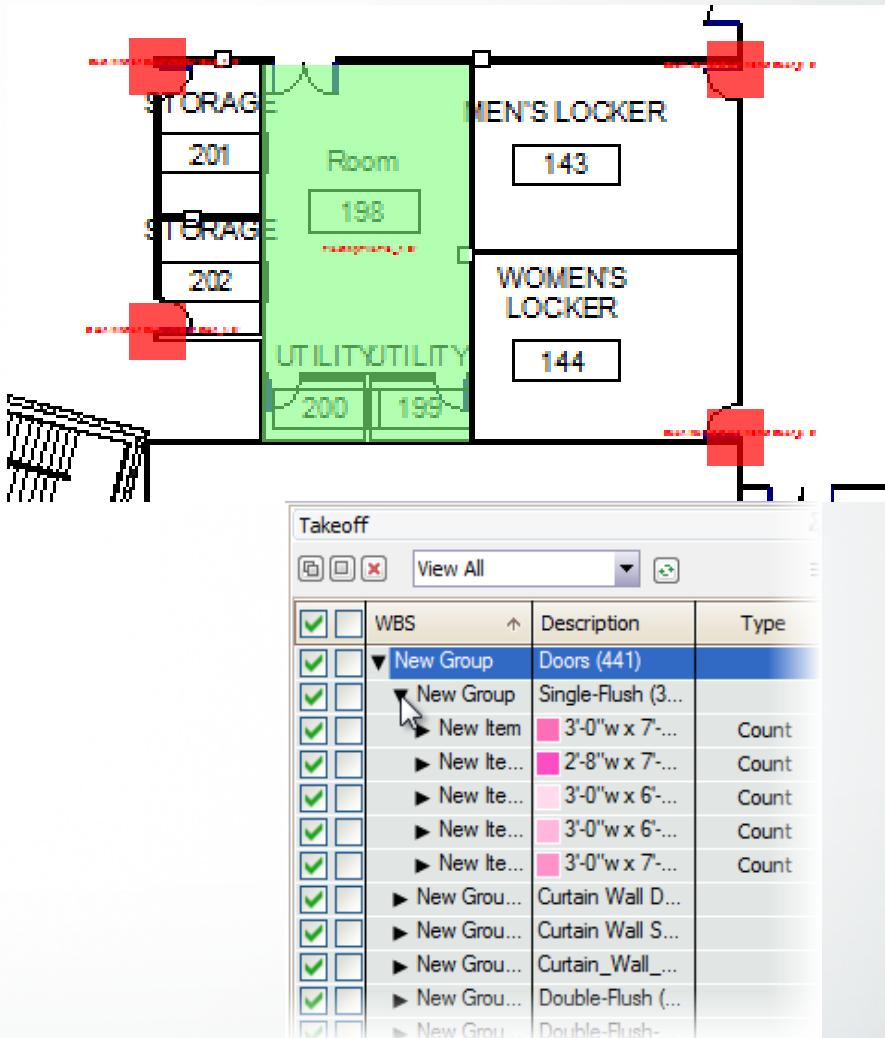

- Migliorare la pianificazione e il coordinamento
- Valutare e quantificare rapidamente l'impatto delle modifiche per i fornitori e per l'intero progetto
- Esplorare soluzioni alternative

# Estendere la progettazione alla stima dei costi

## Autodesk Data Management and Collaboration / Autodesk 360

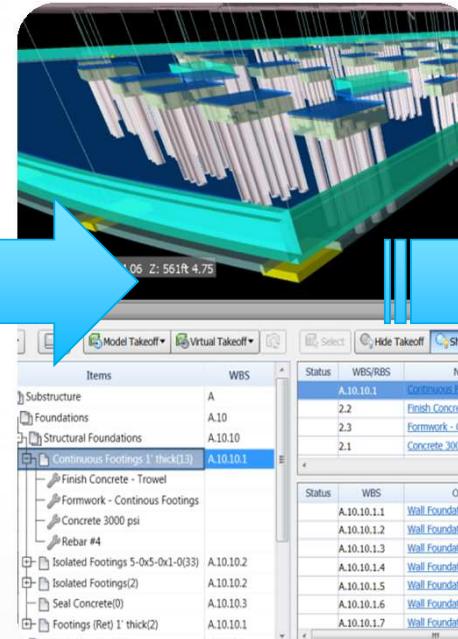

### Managing Design Information

### Item & Resource Management

### Model Based Quantification

### Change Analysis & Reporting

The image shows the Autodesk 360 interface, specifically a "Pivot Table" view. The table is organized by "Row Labels" such as Superstructure, Floor Construction, and Structural Framing. The columns include "Model" and numerical values representing quantities or costs. A blue arrow points from the Navisworks interface to this table.

Row Labels	Model
Superstructure	
Floor Construction	
Structural Framing - Beams	
C12x20.7	426
W12x26	3152
W16x36	19308
W18x50	6264
W18x60	1094
W21x132	804.9
W21x50	7202
W21x57	4166
W24x84	198.3
W108	1049.
W24	357.8
W37	577.4
W37	419.9
Structural Framing - Columns	
Column 14x120	223.8
Column 14x145	
Column 14x176	
Column 14x68	
Column 14x99	
Column 3-9-4-2	
Column HSS6x6x5/16	480.0
Structural Slab - Elevated	
SOMD 6" Concrete - 3" Metal Deck	
Roof Construction	
Structural Slab - Elevated	
SOMD 3" Concrete - 2" Metal Deck	
SOMD 6" Concrete - 3" Metal Deck	
Substructure	
Basement Construction	
Basement Walls	
(blank)	
Foundation Walls (Ret) - 12" Thick	406.9

# # BIM 360 Glue

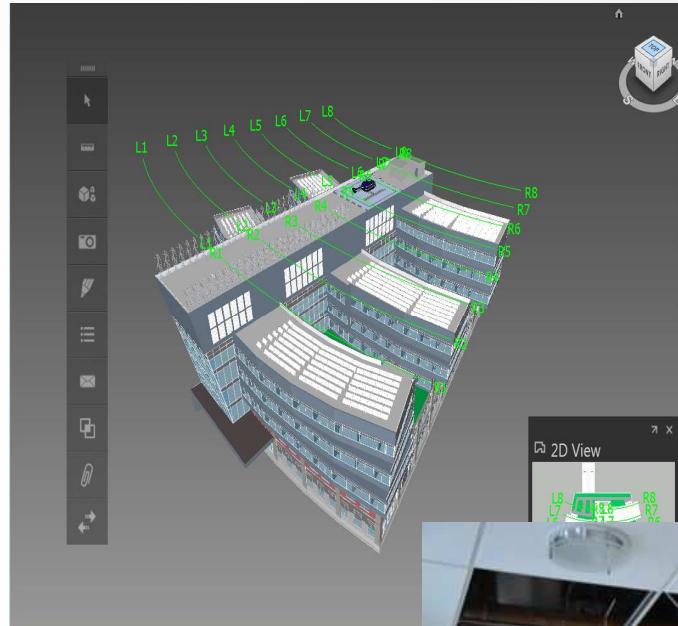

# Autodesk BIM 360

Offre informazioni digitali complete, precise, coordinate, condivise per tutto il ciclo di vita del progetto per chiunque ne abbia bisogno, quando ne ha bisogno, ovunque si trovi.

# Problematiche

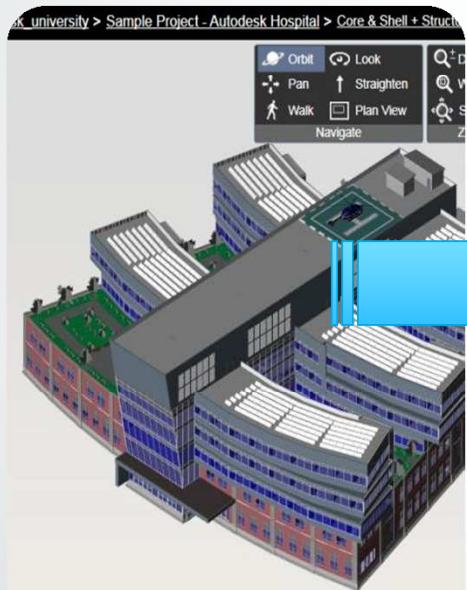

- Modelli molteplici per coordinare le differenti discipline
- Mancanza di collaborazione tra team estesi e distribuiti
- Mancanza di progetto, analisi e simulazioni coordinate
- Aumento di tempi e costi a causa di conflitti ed errori irrisolti
- Processi di business non collegati al BIM
- Operatori con accesso limitato al BIM

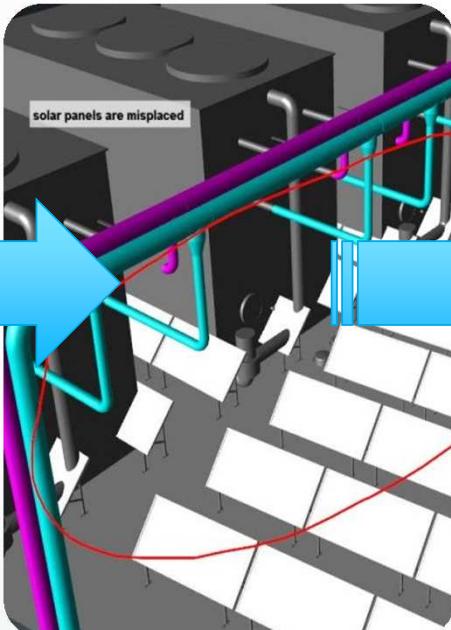

# Collaborazione con team multidisciplinari

# BIM 360 Field rivoluziona la messa in servizio e consegna dei documenti per la qualità, la sicurezza e la gestione

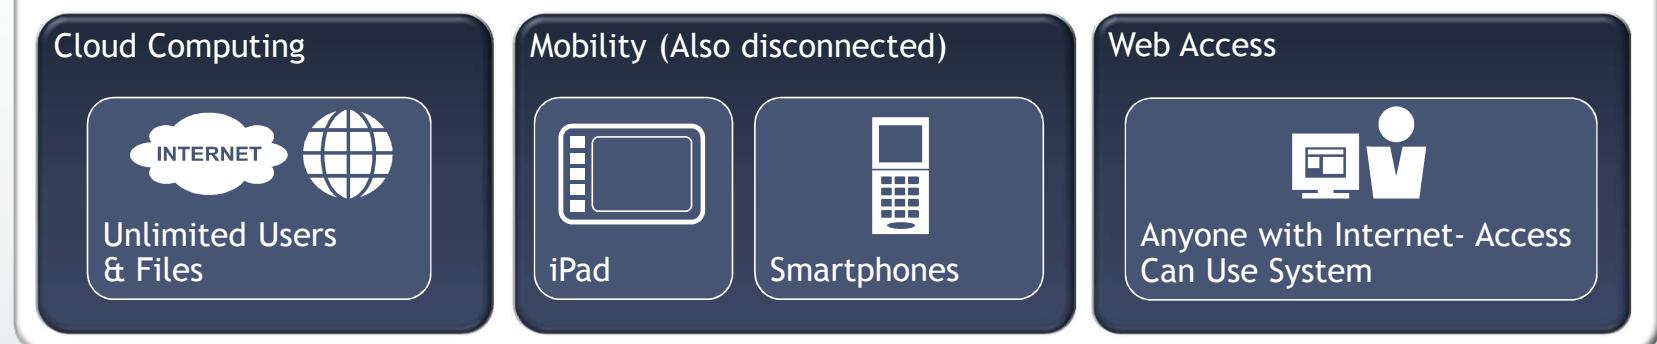

*Cosa facciamo:*

*Come lo facciamo:*

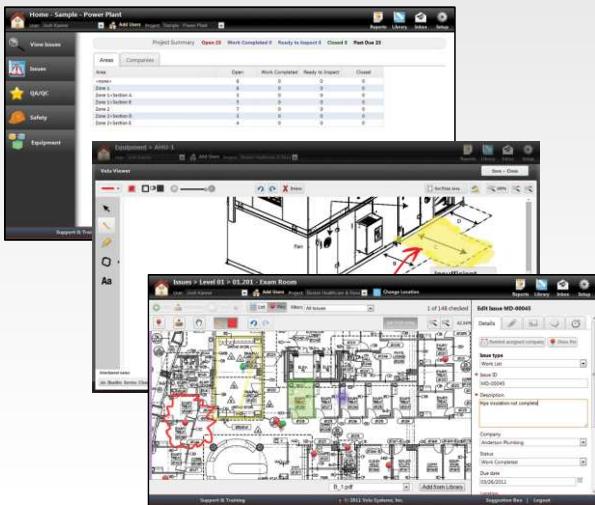

*Key Technologies:*

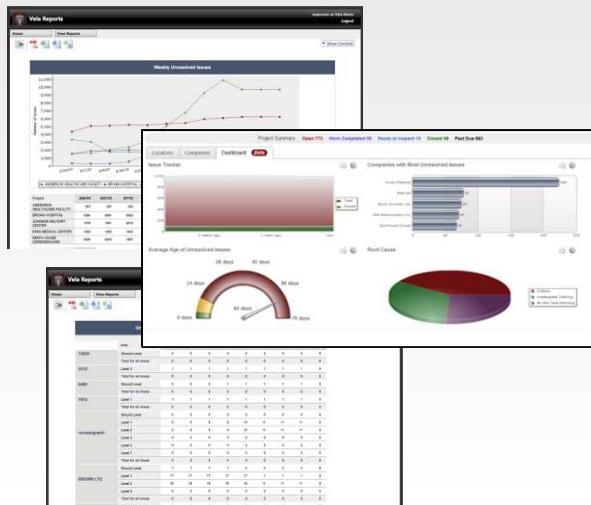

# Componenti di BIM 360 Field

## Servizio Web

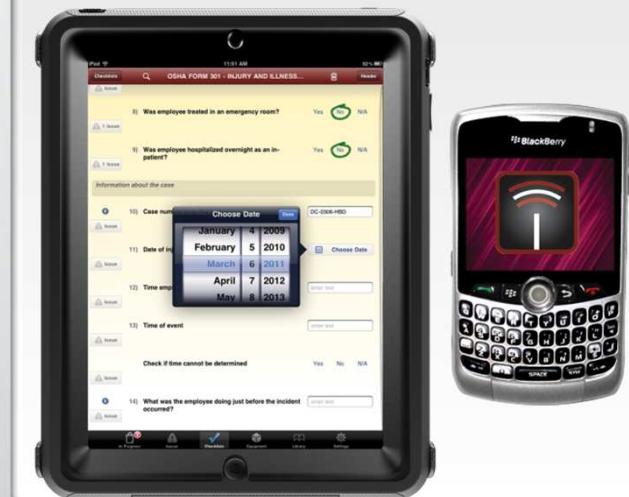

- Web-based accessible da qualsiasi dispositivo
- Cloud-servers
- Disponibile per appaltatori, subappaltatori, proprietari, progettisti

## Report

- Web-based- Accessibile on any device
- Cloud-servers
- Dati in tempo reale, dashboards & email in tempo reale

## Mobile

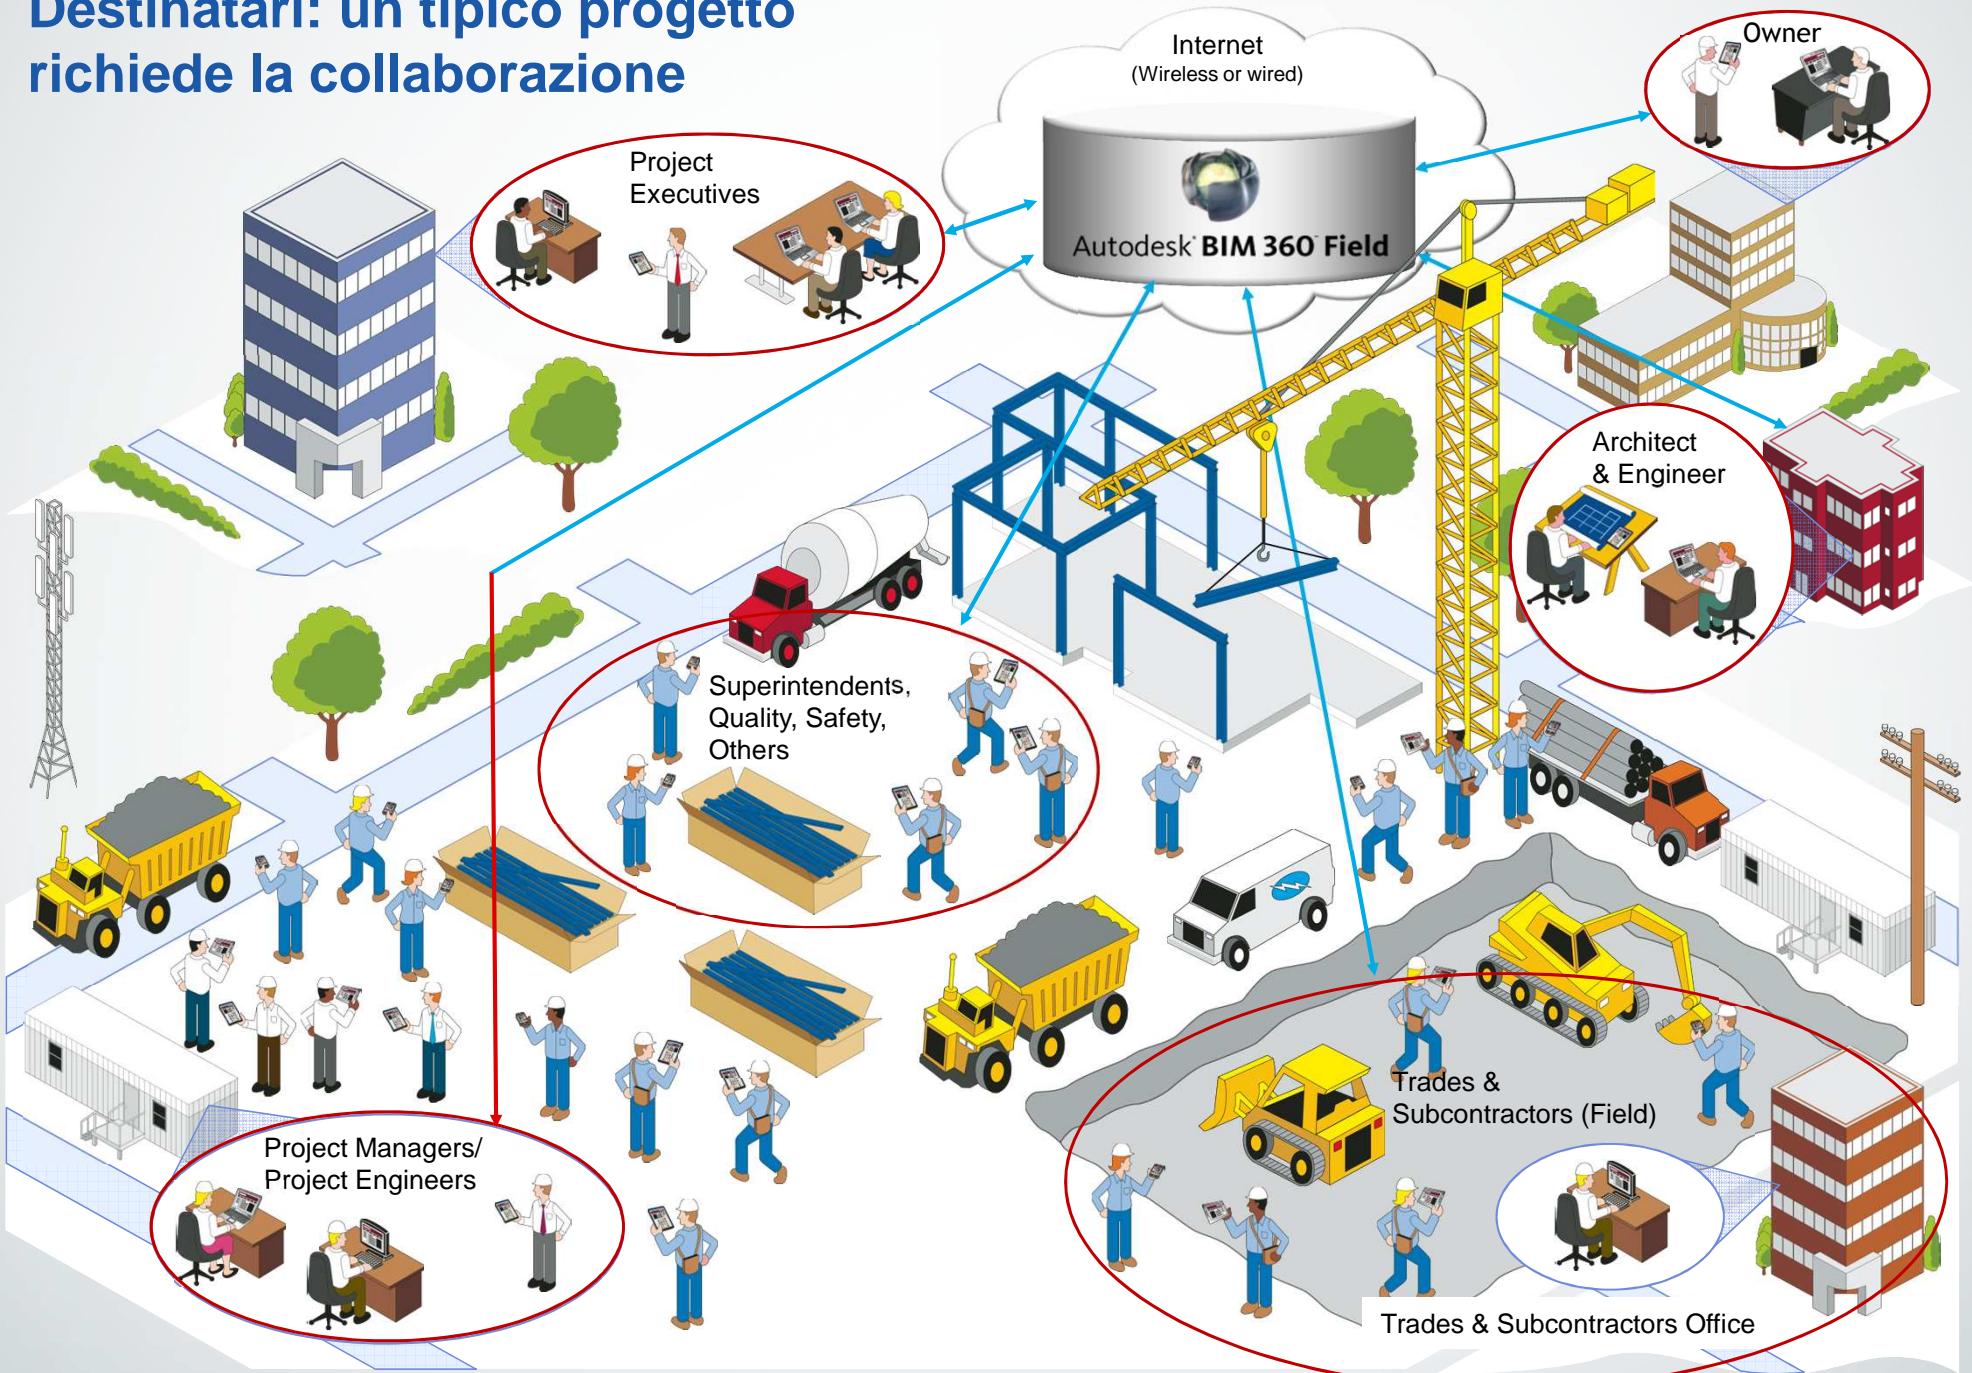

- iPad app & phone con email
- Sincronizzazione
- Funzionamento offline: connettività non necessaria

## Field BIM™

- Includes Field BIM- Data & -Interactive
- Supporta la visualizzazione online su iPad di modelli BIM e di dati

# Destinatari: un tipico progetto richiede la collaborazione

## BIM session highlights from Facility Fusion 2012

Posted On: Aug 28, 2012

Building Information Modeling has emerged as a revolutionary new technology in the facility industry and is dramatically changing the way facilities are managed. IFMA's Facility Fusion conference provided attendees the opportunity to better understand the technology and how it can be used to manage facilities.

Two book covers are shown side-by-side. The left book, "BIM for FACILITY MANAGERS" edited by Paul Teicholz, features a black cover with white text and images of architectural models and a modern building. The right book, "THE OWNER'S DILEMMA" by Barbara White Bryson with Canan Yetmen, features a black cover with white text and images of a traditional building with a tiled roof and a modern building.

## Project Dasher

*Part of the [Building Performance Project](#)*

Project Dasher is an Autodesk research project using a BIM-based platform to provide building owners with greater insight into real-time building performance throughout the life-cycle of the building.

*Building Information Modeling (BIM) is an intelligent model-based process that provides insight for creating and managing building projects faster, more economically, and with less environmental impact. Using meter and sensor data, Project Dasher extends the value of BIM to the life-cycle of the building by integrating BIM data and building instrumentation to provide building owners with more insight into how existing buildings perform in real time.*
